

## The conveniently smart automatic sequential dispenser

Experience the FIRST1-TX, the COROB automatic turntable dispenser featuring bellows pump technology. This robust and affordable solution is designed to replace manual tinting machines, making them a thing of the past. It is perfect for emerging markets, offering a reliable solution for your dispensing needs.

The FIRST1-TX automatic turntable dispenser is suitable for use with water-based or universal colorants and improves customer satisfaction by providing precise and repeatable on-demand tinted paint orders.

Its bellows pumps technology is free from the mechanical stress between the pump and colorant, and virtually wear-free.

This means that the pump can last for a lifetime without needing to be replaced, reducing the need for maintenance.

The practical and cost-effective split packaging approach enables to increase the number of units per shipment and optimize transportation.

Furthermore, the quick and easy step-by-step installation process makes it simple to assemble and set up the machine for immediate operation upon arrival.

Other advantages include its overall height, which allows for simplified refilling of colorants and easy access to all the controls and components, and the advanced connectivity management system that enables smart operation through tablets and smartphones.

### QUALITY ON A BUDGET

Reliable automatic dispensing at a price you can afford

### ACCURACY YOU CAN DEPEND ON

The well-established turntable bellows technology delivers consistent accuracy every time

### READY FOR BUSINESS

Fast setup, easy maintenance, no calibration necessary

### SIMPLE AND EFFECTIVE USE

The ergonomic design and user-friendly controls enable productive daily working

#### ABOUT US

COROB is a global leader with a long and successful history in developing, manufacturing and delivering high-tech dispensing and mixing solutions for the widest range of tinting applications. Our offering is supported by a global service network making COROB a total solution provider.

## Technical data

<b>Business environment</b>	Growing markets, small paint stores
<b>Volume output</b>	Low
<b>Dispensing technology</b>	Bellows pump
<b>Dispensing flow</b>	Turntable sequential
<b>Circuit flow rate [l/min]*</b>	0.2
<b>Minimum dispensed quantity [fl.oz.] (cc)*</b>	1/384 (0.077)
<b>Valve type</b>	Membrane valve
<b>Canister configurations</b>	Up to 16
<b>Canister sizes [l] (q-G)</b>	2.5 (2.64 q)
<b>Colorant compatibility</b>	Decorative: Water, Universal
<b>Dimensions HxLxD [mm] (in)</b>	1242 x 840 x 1003 (48.9 x 33.0 x 39.5)
<b>Footprint [sqm] (sq ft)</b>	0.84 (9.07)

\* Values highly affected by the nature of the colorants and their rheological properties.
